## WISIONS of Sustainability Initiative

WISIONS aims to **empower local practitioners** to identify and scale successful models and **sustainable energy practices** in their regional contexts. By doing so, the initiative **contributes to achieving global sustainability goals**, including access to sustainable energy, poverty reduction, gender equality and well-being.

“WISIONS of Sustainability” is an initiative of the Wuppertal Institute, a German think tank, and has been supported by the Swiss-based foundation ProEvolution since its inception in 2004.

### SEPS project support

Through the supporting scheme SEPS - Sustainable Energy Project Support - WISIONS nurtures innovative energy projects that are environmentally, economically and socially sound and fosters knowledge exchanges between practitioners. To date, SEPS has supported 110 projects across the world and these are all featured on our website, illustrating the lessons learned in the field:

### Practitioner Networks

WISIONS fosters 4 energy practitioner networks to facilitate knowledge development and sharing.

- **RedBioLAC:** the Latin American biogas network; [www.redbiolac.org](http://www.redbiolac.org)
- **RedBioCol:** the Colombian network for energy from biomass; [www.redbiocol.org](http://www.redbiocol.org)
- **Hydro Empowerment Network (HPNET):** for micro hydro power in South and South East Asia; [www.hpnet.org](http://www.hpnet.org)
- **Wind Empowerment Network:** the global network for small wind turbines; [www.windempowerment.org](http://www.windempowerment.org)
